Local & General

Mrs. F. Caldwell was a tea hostess Friday.

Dr. and Mrs. Freeze are visitors in Calgary.

The residence of L. J. Adams is in the hands of the painter this week.

Mrs. B. Hood of Barons is a visitor at the home of Mrs. O. Mueller.

Miss Betty Stevenson of Calgary is a guest of Mrs. Edna Orr this week.

A number from Champion attended the Lethbridge fair on Wednesday.

Sandy Watt and G. Dupuis spent the week end at Waterton Lakes.

Miss Helen Lawrence is spending her holidays at Corbin, B. C.

Mr. and Mrs. George Bailey were visitors at the Lethbridge fair Tuesday.

Mrs. H. N. Heal is spending a few days at Magrath the guest of her mother Mrs. Turner.

Mrs. John H. Higgins of Rathlaw is visiting her sister Mrs. Alexander.

Long Louis and Sam Fong visited the fair at Lethbridge Wednesday.

Miss Gertrude Versalays has as her guest Miss Peters of Three Hills.

It is with pleasure that we are able to report that Mr. W. H. Bowman is again able to be around.

Dr. H. N. Heal and J. D. Henderson left last week by car to enter training at Camp Hughes, Winnipeg.

-Dr. Freeze is a patient in the Western hospital Calgary where he is receiving treatment.

Mr. and Mrs. George Orr attended the Postmaster's Convention held at Calgary last week.

The infant son of B. McLeod was kicked by a horse Thursday resulting in the fracture of three ribs.

Miss Mary Bowman and Mr. Jim Bowman spent the week end at Waterton Lakes. While there they were guests of Mrs. Peacock.

A number of small boys under the leadership of Mr. V. McGuire left Wednesday for a week's camping at Willow Creek.

Auna Caroline Baker celebrated her eleventh birthday recently, when she and her guests enjoyed a swim and picnic at the Bow River.

Geo. Campbell, I. Ditto and C. Rhodes returned recently from a fishing trip on the Livingstone river. They report fishing fair.

Flo Ziegfeld noted theatrical producer and originator of the "Follies" died in Hollywood Friday, July 23, following a heart attack.

Mr. and Mrs. A. Anderson who took up residence on their farm sometime ago left recently for Calgary. Mr. and Mrs. R. Davies are now located on their farm.

Hungarian partridge are to be found in large numbers on the highways and country roads this season. The coveys consist of from eighteen to twenty birds.

Among visitors at the Lethbridge fair Wednesday were Mr. and Mrs. A. W. Jopling and Ruth, Miss K. Cowell, Mr. and Mrs. A. Watt and Mrs. H. N. Heal.

Carl Mack Seriously Injured in Car Accident

Carl Mack is confined to his bed after turning over in a Ford light delivery while making a trip for fuel. The injured man is employed by Mrs. Bertha Anderson. It is believed that the front wheels of the car buckled thus turning over the car.

He was immediately rushed to Dr. Freeze's office, and due to the latter's absence in Calgary, was attended by Dr. Carson of Vulcan. While the extent of his injuries are not definitely known, it is believed he suffered broken ribs, dislocated shoulder, bruised chest and lacerations to his face, ear and hand.

Many Improvements

Quite extensive alterations are being made in the garage owned by I. Granlin. A new cement floor is being laid in the office, a cistern with a capacity of 400 barrels has been installed, while the remainder of the building will be stuccoed. When repairs and interior arrangements are completed Champion will have one of the best garages in this part of the country. Mr. Granlin took over the garage a short while ago and since his purchase has completely remodeled the building. Mr. Granlin is to be congratulated on its very satisfactory appearance.

Irrigation Going Strong

The residents, now supplied with irrigation from J. M. Moffatt's well, have purchased the storage tank discarded by the British American Oil Co. and they will use it in their irrigation scheme. The tank has a capacity of over 10,000 gallons, and the benefit to trees and shrubs as well as gardens will well repay the labor and expense involved.

E. J. Garland M. L. A. addressed an audience at the picnic grounds on the banks of the Bow River near O. B. Smith's ranch on Sunday afternoon, when a fair crowd was present. Those present were treated to a masterful handling of the issues before the people to-day and should Mr. Garland again make an appearance here he would undoubtedly have a larger audience.

While playing over the local golf course on Sunday evening last, Jack McIntyre was fortunate in making a hole-in-one, and unfortunate in not having a witness to the feat. Consequently Jack is not elected to the Hall of Fame.

North Dakota farmers have organized in 4000 townships under the leadership of Dell Willis farmer, and have pledged to hold their grain for one dollar a bushel. If sponsors of the movement are successful the cry will be taken up throughout the United States.

Miss Mary Bowman and Mrs. Bailey were successful prize winners in the Blue Ribbon contest held in connection with the Calgary exhibition. They were each presented with two pounds of Blue Ribbon goods.

NOTES AND COMMENT.

According to an estimate made by bureau statistics officials, the wheat carryover will approximate last year's total. The Calgary Herald comments in part as follows:

"The visible stocks in store on July 15 was 137,013,151 bushels. The bureau of statistics estimates that today the visible is 136,000,000 bushels approximately, where last year on the same date the total was 111,332,813. This would indicate that Canada would have a carryover of approximately 25,000,000 bushels more wheat this year than last. However there are many factors that will tend to almost wipe this out. The farms have almost entirely wiped out their supply, the flour mills have not so much wheat on hand and there is not as much in transit west."

In reading the above it would seem that any immediate improvement in the price of wheat very uncertain.

Among the less favored sections of the west this year is the broad Peace River and Grande Prairie country of Alberta. Latest reports, however, show signs in that territory but the extent of the revival in the grain outlook is not apparent yet. Crops in the maritime and Eastern Canada have generally improved as a result of substantial rains. Harvesting began in Manitoba this week and will be quite general by next week. The prairie crops are now entering the last two weeks prior to the harvest season with everything pointing to a bountiful yield.

One of the most important post-war developments looking to the rehabilitation of Europe and the restoration of that confidence between nations on which international trade and finance are based, has been the signing of the new pact, or treaty at Louvain. Just what is implied by the understanding reached has not been made definite. But the practical effect appears to be a tentative arrangement between Great Britain (and the Dominions) France, Germany, Italy, Belgium, Japan and Poland—with all other European nations to sign later—for the scrapping of war reparations. The arrangement can be effected with the United States. It is felt that the way has been paved to an adjustment of the whole reparations question at the projected World Economic Conference which has been arranged with the assurance that the United States will be represented.

The Market for Canadian Wheat

The world produces each year and consumes in round figures about 4,500 million bushels of wheat. These figures do not include China, which it has been roughly estimated produces and consumes about 600 million bushels. Therefore the amount of wheat produced and consumed by the entire world is probably in excess of 5,000 million bushels per annum.

Most of this wheat is consumed in the country in which it is produced. Some countries, however, produce less than they require and so have to import wheat and wheat flour. Some other countries produce more than they can consume and so they have to export a wheat flour for export sale.

The amount of wheat which is thus imported and exported, most of it across the seas—of which enters into International Trade—is between 750 and 800 million bushels each year. This is the market and the only market that is available for the wheat that Canada cannot consume at home and which she has to sell abroad.

Canada's average wheat production for the last ten years has been 800 million bushels per annum. Her exports of sales abroad for the same ten years have averaged 250 million bushels per annum in the form of wheat and wheat flour, or about 70 per cent of her total production of wheat. The amount she has exported as wheat has averaged 227 million bushels per annum, and as wheat flour 49 million bushels per annum.

Competition for the World's Wheat Markets

The world's total export wheat market is slightly under 800 million bushels per annum. About 20 different European countries usually import this wheat. About one-fifth of this total is imported by countries outside of Europe.

Of the European importers Great Britain is the largest, averaging about 220 million bushels each year of wheat and wheat flour, but some of this is re-exported from the United Kingdom to other countries. The wheat exporting countries, who are keenly competing for this world's market, consist of Canada, the Argentine, U. S. A., Australia, Russia, the Balkan States and Hungary, India, North Africa, Chile, and sometimes others; stated above in the order of the quantities they export.

The average exports per annum for the last seven years for each country are shown herewith and the estimated export for the present year is shown in brackets.

Canada 251 million (200)—Argentina 147 million (142)—U. S. A. 131 million (120)—Australia 100 million (125)—Russia no average, last year 99 million, this year 50 million—Chile 19 million (75).

Those exporting countries that are able to offer for sale a higher quality wheat than the average, or who produce the average quality and offer it for sale at less than the average price, will retain at least their proportion of the 800 million bushels world's wheat market.

The Olympic games starting Saturday in Los Angeles will go down in history as the biggest athletic show of all time from every standpoint including attendance. More than 2,000 athletes and officials arrived in that city from Great Britain, Canada, South Africa and Hungary. The setting, including the running course, the Olympic village and the Olympic stadium is said to cost the municipalities of Los Angeles approximately \$5,000,000.

Local and General

Mrs. Theriault and Mrs. Dagle motored to Orford and spent a few days visiting their sister at that point. Lauretta returned with them to spend the holidays here.

Miss Mabel Lawrence has returned from Olds Agricultural School where she spent a week. Having won the scholarship course at Reid Hill School Fair. She reports having a wonderful time while there.

Operations have ceased at the hopper bait mixing station. Grasshoppers are still to be found in numerous quantities. However, very little damage is reported. In some cases oats are being cut green to avoid heads being cut off by the pest.

Mr. and Mrs. Stedman and daughter of Winnifred, Mrs. Barnes and daughter of Corbin, B. C. Mr. and Mrs. Goss and family also of Corbin and Miss Iris Payne of Lethbridge have been visiting at the home of George Lawrence.

Mrs. Arnold Becker has been in Calgary with her infant son who has been ill. After an examination it was found that an operation would be necessary and Mr. Becker left immediately for that point.

A number of people from Champion and district gathered at Mrs. Boner's on Saturday in honor of Mr. and Mrs. F. Hardisty who are visitors here from Spokane. A very enjoyable afternoon was had by all.

A. W. Jopling, agent for the British American Oil Co. has practically completed installing two new storage tanks, each with a capacity of 14,000 gallons. These tanks are 21 feet in height and add considerably to the B. A.'s premises.

Intense heat for the past week coupled with a warm wind was distinctly hard on the wheat and other grain fields and considerable damage has resulted. If the dry weather continues an early harvest is quite evident.

Champion baseball club met the Stavelay nine at Stavelay on Sunday in an interesting game. Due to several errors on Champion's part they were forced to take the short end of the score 5-2. The batteries for Champion were: Walker and Matlock for Stavelay Bess and Allen.

Mr. and Mrs. Farmer left for Calgary on Tuesday to meet the Messes Geraldine and Helen who have been visiting at Trochu. Miss Kathleen Farmer of Edmonton will return with them and be their guest for a few days.

D. Campbell, A. Ulrich and E. Harper left Sunday morning with a covered wagon and saddle horses for a camping and fishing trip to be spent in the mountains. Their method of travel permitted their holiday to include territory that would be completely out of reach by car. Considerable anxiety is felt on their account as one man left with a kink in his neck and their early return is keenly anticipated.

We regret the error in last week's paper regarding Miss Maxine Ditto's birthday. The article should have read: the Misses Marjorie McCullough, Ruth Dupue and Mavis Moffatt are spending a few days as guests of the Misses Dorothy, Maxine and Marjorie Ditto.

Billy Bouzvan who has been a patient in the Junior Red Cross hospital, Calgary for the past few months has been dismissed and is making rapid progress toward recovery. Billy at present is a guest at the home of Mr. and Mrs. Ed. Latiff.

There will be a big harvest dance at Alston on Friday, Aug. 5. Music will be supplied by the Rhythm Vendore. Admission will be 50c per couple supper included.

There will be a ladies softball game at 7:30 between Alston and Champion.

Thieves broke into the office of the Beaver Lumber Co. Wednesday night, entering through a window, evidently using a crowbar as a pry.

A valuable watch and chain and a pen and pencil to match were stolen along with numerous other articles. This is the first time in quite a while that a crime of this nature has been committed in the town and it is hoped that it will be the last.

Immense Value To Canada Of Her Wild Life Resources Stressed By Minister Of Interior

The tremendous value to Canada of her resources in wild life was stressed by Hon. Thomas G. Murphy, Minister of the Interior, in his opening address at the Provincial Dominion Game Conference which was held recently in Ottawa. He stated that the Dominion's annual income from wild life had been estimated at \$53,000,000, and that to many people, especially the Indians and Eskimos, the wild life was their only means of livelihood.

Mr. Murphy, under whose Department the administration of the Migratory Birds Convention Act comes, prefaced his remarks with an outline of the important work before the Conference. He drew attention to the fact that the Act applied to insectivorous birds, which are among man's greatest friends, as well as to game birds, a point of great importance. The habits of these desired study, as well as those of game birds, to secure information to guide their administration. The Act's Pioneer planismen could not believe that the buffalo were practically extinct in the wild state, nor could residents of Canada and the United States conceive that the wood pigeon, which once flocked in countless numbers, would completely vanish from the earth.

Reports received at Ottawa in the past year showed that this was a time of crisis in regard to waterfowl. The drying up of the marsh areas in Southern Manitoba and Saskatchewan and in northern Alberta, which were the breeding grounds of the wild duck, had seriously decreased the supply of ducks over the greater part of Canada and the United States. This situation suggested the need of regulation and control, if ducks were not to disappear like the wood pigeon.

No better plan to protect birds had been devised than that of bird sanctuaries. In addition to the many sanctuaries scattered through the settled parts of the provinces, especially the Prairie Provinces, large areas in the Northwest Territories had been set aside as reserves in which native hunters could hunt, and in which the territory reserved all that portion of the province north of the transcontinental railway line for the use of Indians. Altogether in Canada 560,000 square miles of country had been so set aside.

Mr. Murphy gave a few personal observations as a duck hunter. The courtesy of sportsmen was, he said, a wonderful thing. One sportsman, seeing for an hour now another, came on, felt he needed no formal introduction, because he realized by the other's actions that they both had the same point of view, the same fair play, and of keeping in mind the future, and the pleasure of those who might come after.

This led Mr. Murphy to discuss the question of law enforcement. The best way, in his view, was to pass on the information as to the need of conservation to get the same idea with them. As soon as sportsmen saw the need they would not only carry out the regulations, they would set up an even higher standard of their own, and they would frown down any violations of the Act on the part of others.

The problems of administration were not all the same in all parts of Canada. The object was to secure conservation. Those present believed, were men who would not only look at things from the administrator's standpoint but also from that of the sportsman in the field, so he believed this Conference would be an unequalled success and would derive regulations which would further conserve wild life for the future, and present time but also for future generations.

Brazil will extend three of its government railway lines.

Wins Cowboy Championship

Alberta Horseman Awarded Honors At Calgary Stampede

Excelling in all the arts of horsemanship, steering riding, roping and other performances for which he was chosen, Horace E. Cardston, of Alberta, was awarded the North American all-around cowboy championship, at the Calgary stampede. The title previously was held by Eddie Woods, of Emmett, Idaho.

Linder also captured the Canadian all-around championship and the similar provincial honor, both of which he held last year.

The North American bucking horse riding championship was won by Peter Knight, of Crossfield, Alberta, with his youthful namesake, Harry Knight, of Banff, taking the championship with him.

A new recognized world record for calf roping (loose rope), was set by Bob Froude, of Ennis, New Mexico, who roped and tied his calf in 13 and 4 seconds, compared with the previous record of 15 and 2-seconds.

"Smiley" Snider, of Kimberley, B.C., won the Canadian championship bareback bucking contest.

More than 17,000 people visited the stamper during the week.

Advice Of A Champion
Great Swimmers Say He Never Takes Any Chances

"Take no chances when swimming. Take no chances by being careless when on or in the water. The other day one of the greatest swimmers on this continent, Johnny Weissmuller, said this:

"I am a champion swimmer, yet I would not move more than a half mile from shore alone without a boat in attendance. Not a I would put a loaded gun on my head, nor a trigger, nor a dangerous as that. Don't show off, and just keep cramps in the back of your mind when you are tempted to swim out of sight or aid of others."

Are ordinary folk as careful as Weissmuller? His advice—the advice of a champion—should be taken to heart—Regina Leader-Post (Evening).

The Primary Producer

One Farmer, At Least, Is Sure That There Is a Depression

L. B. Shaw, of Standart, in Alberta sheep farmer who is quite positive a depression of some kind prevails in this world.

He shipped 10 sheep to Calgary recently, receiving 25 cents for each animal—and also a bill for \$4.80 which included the cost of freight, commission and load. Instead of receiving 25 cents he sold the sheep for 23 cents more than he got for them.

A farmer of Port Alberni, B.C., decried the "farming" in a luxury for the wealthy only. A short time ago, he stated, he forwarded two bales of wool to the brokers to be washed, combed and sold. Instead of receiving a cheque, he received a bill for \$3.80.

British Columbia In Lead

The greatest number of divorces were granted in British Columbia during 1931, the total being 208, which was a decrease of 47 from the previous year. Alberta had 154; Manitoba, 94; Ontario, 82; Saskatchewan, 51; New Brunswick, 20; and Prince Edward Island, one, the last being the second divorce in the history of the province. The majority of the decrees granted were at the petition of the wife last year.

Won and Lost

A repairman called on Walter Armstrong, of Cleveland, Ohio, a few days after he had won a radio in a furniture company drawing and asked if the set was working properly. Armstrong complained of a slight hum and the man took the set to have it fixed. Police were seeking the man and the set. Armstrong learned the company had no repairman.

Effects Big Saving

Ink can now be removed from old newspapers, making possible remanufacture of the pulp with a resultant saving of at least 50 per cent. in the cost of white paper. James Flett, of Chicago, told the 12th annual convention of the Southern Newspaper Publishers Association at Asheville, North Carolina.

How Times Have Changed

In Seventeenth Century Authorities Were Opposed To Smoking

Many people nowadays enjoy smoking a cigarette or a pipe of tobacco. But our ancestors had to put up a stout struggle to obtain for us the right to smoke. The authorities of almost every country were opposed to the practice in the seventeenth century, largely on account of the supposed danger of fire in connection with the wooden houses then in vogue.

King James I. wrote a treatise condemning it, and tried his best to stop it. Popes issued their Bulls against it. In Russia smokers were punished with the bastinado or the knout; those convicted of taking snuff had their noses torn away. The Bull of Turkey, Murad the Cruel, issued an edict forbidding the use of tobacco in any form under penalty of death, and thousands of offenders were summarily executed. In Persia smokers were impaled and left to die in lingering torment, or they were encased in liquid cement that, as it hardened, crushed them slowly to death.

But in all vain! Throughout the world the passion for smoking persisted; and even the fear of death was of no avail with devotees of the habit.

There were people who supported smoking on medical grounds. In England its use was advocated by the doctors as a preventative to plague, so that, as recorded by Count Corty in his newly-published "History of Smoking," boys at Eton College were actually ordered to smoke during the various plague epidemics. Some of the scholars, however, did not like smoking, and they were severely handled.

The records of the school contain many entries of boys being flogged for "not smoking in chapel."

During the Great Plague of 1665, the people who were wary of smoking, sick, or carrying the corpses of the dead out of the city, smoked incessantly, to ward off the infection.

An Amusing War Story

Discipline In Australian Army Differed From British Standards

Some amusing war stories are told by Mr. Cedric Hardwicke in his new volume of reminiscences entitled, "From Boer to Kaiser."

At one time his division was attached to an Australian corps, the people who were bony fighters; but their ideas of discipline, judging by our standards, were frankly shocking.

One morning, says Hardwicke, our divisional general called on Australian G.H.Q. When he came out he inquired of the sentry where his car had gone, and was asked in return: "How the blazes should I know your car if I saw it?"

Scandalized and furious, the general sought out the Australian commanding officer and complained of this rank insubordination. He was listened to with respectful silence to the end, when the Australian commanding officer remarked: "If you, you, you, general, but how the blazes was he to know?"

Idea Did Not Work

Economy Measure In Hungarian Town Caused Burglary Boom

Owing to the need for economy, Subotica, one of the richest Hungarian towns before its acquisition by Yugoslavia, was obliged to cut off street lighting owing to lack of public funds. The complete darkness, however, caused such a boom in burglary that the district governor was overwhelmed with telegrams of complaint, and in the interest of public safety the gas works were instructed to carry on.

Ponce de Leon, discoverer of Florida, died of poisoning from an Indian arrow.

KAYE DON TRIES OUT HIS RE-DESIGNED "MISS ENGLAND III"

Kaye Don drove his new "Miss England III" over the silvery waters of stilled Loch Lomond at the record speed of 119.81 miles an hour to return again to Great Britain the world speed standard on sea.

Winnipeg Newspaper Union

A SMART LITTLE BIG—HAS NUMEROUS POSSIBILITIES IN SHEER OR STUDY COTTON OR LINEN

The brief notice is double-breasted effect makes it quite unusual. It has a generally full cut skirt with fluffs to swish about. A blue and white dainty print with white trim is daring as sketched. Then there are delightful ballet prints, voile prints, pique, linen and flannels, all so fascinating and suitable for this model in pale blue or pink scheme.

It is made in a jiffy! And won't you be surprised at its small cost. Style No. 527 is designed for sizes 4, 6 and 10 years.

Price of pattern 25 cents in stamps or coin (both preferred). Wrap cut carefully.

Sundrops and Grashoppers

Said To Multiply and Thrive During Years of Sunspot Minimum

Numbers of grasshoppers fluctuate with the eleven-year sunspot cycle. They are most numerous at sunspot minimum according to investigations carried out at the Dominion Observatory, Department of the Interior, Ottawa. A record of grasshopper numbers in Manitoba, 1885-1929, published by an official of the Entomological Branch, Department of Agriculture, Ottawa, shows a close relationship to the sunspot cycle.

Rubber Factory In Turkey

Sweden is building the first rubber factory in Turkey, located in Istanbul. The new enterprise is organized by Gustaf Glosow, head of the Swedish rubber plant at Glästad, in connection with the Swedish Co-Operative Association. It will be led by Gustaf Korner, a Swedish engineer, although all workmen will be Turks.

Work On Huge Waterway Plan To Commence Next Year Will Spread Over Seven Year Period

Assists British Subjects

British Columbia Woman Gives Useful Service In Los Angeles

Down in Los Angeles, where a tough British subject is having a some time fighting the depression and the aftermath of the real estate boom, a Canadian is doing valuable work in making their situation easier. She is Mrs. Elsie MacCleave, formerly Miss Elsie Craig of Penitentiary, B.C.

This energetic Canadian woman is head of the British Benevolent Association which undertakes to straighten out many of the worries of stranded Britishers.

This organization is a community chest agency in which the relief work of the Daughters of the British Empire and the British War Veterans is joined. They are looking after British war veterans, straightening out pension complications, coaxing overseas relatives to see their duty and do it by these expatriates of theirs; looking after a variety of claims; attending to Britishers who have visited immigration laws, and persuading His Majesty's government to buy their way home, and countless other embarrasments that beset so many of the 100,000 British in Southern California.

Mrs. MacCleave was born in the Klondike, schooled in Berlin, speaks German like a native, and was there fore detailed for prison war camp work in England during the war. Serving with the British Consulate in Los Angeles during the Hon. Geoffrey Fisher's seven years, she knows that city well. With the help of a few valued friends she takes care of all family cases.

Mystery Station A Puzzle

New Zealanders Seek Program From Some Unknown Station

Radio fans in New Zealand have been much puzzled by a mysterious broadcasting every night, and radio officials in the country have been unable to locate its source. The announcer always prefaces his remarks with "Hello, hello," and at times it sounds like "Hello, hello," but it is undoubtedly the equivalent for "Hello, hello." Some nights he gives an English-American program, and on those nights he announces in what is presumed to be Ammanese, English and French, but his remarks in English are hard to follow owing to the foreign accent. When he commences his announcing in English after speaking in Ammanese, he undoubtedly says "Hello, hello," but with a foreign accent. Some authorities believe it may be from the powerful station at Saigon, French Indo-China.

Message From The Sea

Tells Of Flight Of Seaman Off Coast Of Africa, More Than 34 Years Ago

A message from the sea, purporting to tell of the plight of a seaman off the coast of Africa more than 34 years ago, was picked up recently by Austin Carly on the shore of White's Cove, Digby Neck, N. S.

It was pencilled on a piece of ruled paper, written with age, and contained in the traditional bottle. "January 17, 1858—somewhere off the coast of Africa—Have just sighted land after 33 days and 40 nights. I have one loaf of bread and one pint of water. My strength is going and I don't think I will reach land.—Oscar Lawrence, A.B."

High railway rates are driving business losses in Albania.

With the net new capital cost of \$40,000,000, the St. Lawrence waterway treaty was signed at Washington. Work will spread over a seven-year period from early next year to 1940.

The net new capital expenditure by the Dominion is estimated at \$38,071,000, but this figure may be decreased by \$4,233,000 if the necessity for a guard lock in the Beauharnois canal is eliminated.

The net outlay of \$38,000,000 is the total payment Canada will have to make after being paid an approximate amount of \$67,000,000 by Ontario and allowed \$28,000,000 by the United States for the New Welland ship canal and other works.

The treaty, which contains provision for a two-stage development. The treaty, which deals with the international section of the St. Lawrence, discloses that dams will be located at Crysler and Barnhart Islands. A 27-foot channel is to be built to allow ocean vessels to proceed to the head of the lake.

A "St. Lawrence international rapids section commission," composed of five Canadians and five Americans, will construct the works in the international rapids section. Power-house superstructures, machinery and equipment required for the development of power, such as Ontario projects, will be outside the authority of the commission.

In the construction of 1,100,000 horse power which it will contain in the international section, Ontario will spend \$10,300,000 at the Crysler Island plant and \$21,600,000 at Barnhart Island.

Canadian engineers, Canadian workmen and Canadian material will be employed in respect to the river works lying on the Canadian side of the international boundary. Upon completion, all river works on the Canadian side of the international boundary will be owned, maintained and controlled by Canada.

Total net cost to the United States will be \$28,071,000. This amount is made up of \$65,100,000 for channel deepening and other necessary works, the upper lakes section and \$175,901,000 in the international rapids section.

Work Of Stone Age Artist

Five Statuettes Found In Russia Are Very Old

Five mammoth-bone statuettes, believed to be 25,000 years old, have been discovered in a palaeolithic camp at Gagarino, in the Tambov Province, Central Russia.

Archaeologists say that there can be no doubt that the statuettes were made by a Stone Age artist, when Southwestern Europe was inhabited by the Cro-Magnon race, at least 25,000 years ago. Ancient stone instruments, fragments of mammoth bone, and bones of other animals of the post-glacial period have been found on the same site.

Canada's Wood-Pulp Production

Of all the wood-pulp produced in Canada in 1930, according to the figures lately issued by the Dominion Bureau of Statistics, in co-operation with the Forest Service, Department of the Interior, somewhat over 92 per cent, was composed of two species, namely, spruce and balsam fir, or balsam. The remainder was made up of hemlock, jack pine, and poplar, with a few less important kinds.

An Old Wedding Gown

A Chinese wedding gown 125 years old was shown at Oshkosh, Wisconsin, by Clara Lem, fifteen, daughter of Mr. and Mrs. John C. Lem, who came to the United States from China in 1910. The gown first worn by Clara's great-great-grandmother and handed down through five generations.

Wild parrots nest in hollow trees, usually in small colonies.

The stickiness of milkweed juice is due to its rubber content.

"Mary did you find half-a-crown on this table?"
"Yes, thank you very much, sir."
"All for Alla, Stockholm."

THE HOUSE OF DREAMS-COME-TRUE

MARGARET FIDLER
"The Herald of the Morning"
Hodder & Stoughton, Ltd., London.

CHAPTER XXVI.—Continued.

"Yes," he acquiesced slowly. "It is getting late."

A look of concern spread itself over Jean's face.

"I think we ought to get the car out again and go and see if anything has happened," she said decisively.

"They may have had a spill. Were they coming by motor?"

"No. Judy drove down to Newton Abbott in the dog-cart, and the Holifords proposed hiring some sort of conveyance from a livery stable."

"Well, I expect they've had a smash of some kind. I'm sure we ought to go and find out! Was Judy driving that excitable chestnut of yours?"

He shook his head.

"No—a perfectly well-conducted pony, as meek as Moses. We'll give them a quarter of an hour more. If they don't show up then, I'll run the car out and we'll investigate."

The minutes crawled by on leaden feet. Jean felt restless and uneasy.

More than a trifling anxiety, that Burke should manifest no little anxiety concerning his sister's whereabouts.

It was not until the quarter of an hour was up that the shrill tinkle of a bicycle bell, and a boy cycled up to the gate and, springing off his machine, advanced up the cobble path with a telegram in his hand.

Jean's face blanched, and she waited in taut suspense while Burke tipped open the ominous orange-coloured envelope.

"What is it?" she asked nervously.

"Have they—it is bad news?"

There was a pause before Burke answered. Then he handed the flimsy sheet to her, remarking shortly:

"They're not coming."

Jean's eyes flew along the brief message.

"Returning tomorrow. Am staying the night with Holifords, Judy."

Her face fell.

"How horribly disappointing!" Her glance fluttered regretfully to the faint disc of the moon showing like a pallid ghost of itself in a sky still luminous with the afternoon sunlight.

"I shan't see my moonlight-maid to-night after all!" she continued. "I wonder what has happened to make them change their plans?"

Burke counteracted no suggestion but stood staring moodily at the swiftly receding figure of the telegraph boy.

"Well," Jean braced herself to meet the disappointment, "there's nothing to do for you but to run back home, Geoffrey. We ought to start at once."

"Very well. I'll go and get the car out," he answered. "I suppose it's the only thing to be done."

He moved off in the direction of the garage. Jean walking rather disconsolately beside him.

"I am disappointed!" she declared. "I just hate the sight of a telegraph boy! They always spoil things. I rather wonder you get your telegrams right off this outlandish rope!"

she added musingly.

"Oh, of course we have to pay mileage. There's no free delivery to the back or beyond!"

As he spoke, Burke vanished into the semi-dark of the garage, and presently Jean heard sounds suggestive of ineffectual attempts to start the engine, accompanied by a muttered curse or two. A few minutes later

Burke reappeared, looking rather hot and dusty and with a black smudge on the corner of his cheek.

"You'd better go back to the bungalow," he said gruffly. "There's something gone wrong with the motor, and it will take me a few minutes to put matters right."

Jean nodded sympathetically and retreated towards the house, leaving him to tinker with the car's interior.

It was growing chilly—the "cool of the evening" manifests itself early on at Dartmoor—and she was not at all sorry to find herself indoors. The wind had dropped, but a curious, still sort of coldness seemed to be permeating the atmosphere, faintly moist, and as Jean stood at the window, gazing out half absently, she suddenly noted a delicate blue mist veiling the low-lying ground towards the right of the bungalow. Her eyes started, and she went to the door, and

she saw Burke standing in the front of her. The valleys between the distant firs were hardly visible. They were become mere basins cupping warm lakes of watrilike vapour which, even as she watched them creep higher, inch by inch, as though impelled by some impulse of a rising tide.

He had lived long enough in Devonshire to know the signs of risks of being caught in a mist on Dartmoor, and she sped out to the garage, intending to go to the garage to get the car out.

He met her on the threshold of the bungalow, and she turned back with him into the room she had just quitted.

"Are you ready?" she asked eagerly. "There's a regular motor mist coming on. The sooner we start the better."

"The car won't budge," he said. "I've been tinkering at her all this time to no purpose."

He stared at her in vague apprehension of disastrous possibilities presenting itself to her mind. Their predicament would be an extremely awkward one if the car remained recalcitrant.

"Won't budge," she repeated. "But you must make it budge, Geoffrey. Won't you just stay here! What?"

He looked at her with a confused expression, and she said: "I've been tinkering at her all this time to no purpose."

quitte expressiveness.

"No? So much the better, then. But I wasn't going to leave any weak link in the chain by which I hold you."

"By which you hold me?" she repeated. "You'll let me know when I'm not interested, only I shall repeat, parrot-like, the words he had just used."

"Yes. Don't you understand the position? It's clear enough. I should think!" He laughed a little recklessly.

"Either you promise to marry me, in which case I'll have indoors. The wind had dropped, but a curious, still sort of coldness seemed to be permeating the atmosphere, faintly moist, and as Jean stood at the window, gazing out half absently, she suddenly noted a delicate blue mist veiling the low-lying ground towards the right of the bungalow. "Yes," he acknowledged.

Jean was silent. It was all clear now—penetratingly so.

"Three hundred and fifty more rain gauges will be set up in the prairie provinces according to a statement given by the Seale Grain Company, of Winnipeg, through H. G. Le Strange of the research department.

Following the meteorological conference at Winnipeg early this year the meteorological branch at Ottawa approved the recommendation for enlarged equipment of this nature but economy measures made purchase and establishment impossible. However, with the approval of the Dominion Department the Seale Grain Company have had manufactured 350 additional gauges. There will be now a rain gauge at every Seale elevator in the three prairie provinces, and a total of 320 in addition to those already operated by the meteorological service of the Dominion.

Emphasis is laid on the fact that information from records obtained is available to every organization or individual interested and is in no way to be considered a private enterprise in this respect.

Origin of The Mace
Symbol of Authority Was Once a Popular Weapon

The mace is now a symbol of authority for the Speaker of the House of Commons, Lord Mayors, Mayors and other dignitaries, was originally a popular weapon. It was favored by the warlike clergy, to whom the sword was forbidden. Then its use can be traced to the Crusades, when knights carried their gaucel maces as the most convenient weapons to combat the attack of Assassins. (The Assassins—or Hashashins—were members of a fanatical Eastern sect who dealt themselves with the dagh bashah before their sorties.)

After the Crusades, the mace was retained by the followers of kings and princes and so became the symbol of authority as we now know it. The second, the "bauble" which Cromwell ordered to be removed, passed through various hands and is understood now to be in a museum at Kingston, Jamaica.

THE RHYMING OPTIMIST
By Aline Michaels

THE EVERLASTING ARMS
To lie relaxed in Love! At last to know

The buoyant strength a weary swimmer finds
Beneath him when, worn out, he must let go

To float, to drift like sea-weed or like a cork
To merge with ocean, with the waves and surge

To let time's cares, forgotten, drop away
Himself a fragment of eternity!

This is to know the Everlasting Arms.
To be uplifted into peace at length,
Secure against all temporal alarms.

Safe in the shelter of unflinching strength,
Unhindered all life's angry winds and waves
To be relaxed in Love that soothes and saves!

Wrong Number
With a slight trembling hand he dialled his telephone number and waited. At length came a woman's voice.

"Hello," he said. "Is that Mr. Jones?"

"Yes,"

"I say, dear, will it be all right if I have a couple of fellows to dinner?"

"Certainly, darling."

"Sorry, madam," said he. "I've got to bring Mrs. Jones home."

Well-Wearing Shoes
William Sherratt, 55-year-old football player of Spynie, Australia, has worn the same pair of football boots for the last thirty years. The shoes have never been repaired and he uses the original laces to tie them.

Suffered A Severe Attack Of Dysentery

Dr. P. L. D. Moffat, Vernon, B.C., writes: "Last summer I suffered from a severe attack of dysentery. I tried everything on the market, without getting any relief, until a friend told me to use Dr. Fowler's Extract of Wild Strawberry, which I did, and I got immediate relief. Now I am a couple of fellows to dinner."

"Certainly, darling."

"YEARS CAN BRING YOU ADDED CHARM!"

SAYS JACK HOLT

"Some women seem to grow more alluring every year," says Jack Holt. "Birthdays only add to their charm."

"Here in Hollywood you see them every day—actresses still every bit as youthful as they were years ago, more poised, more irresistible than ever. Still the ideal of an actress public!"

"No matter what her age, a woman who has the fresh, glowing complexion of youth is always a success."

"I should think that every woman would want to have the complexion of youth."

"The screen and stage stars know!"

"You will want to know how the lovely stars keep their complexion so fresh and glowing."

"The secret is in the use of the right cream."

"Guard your complexion every day, and you will do it," says Jack Holt.

WORLD HAPPENINGS
BRIEFLY TOLD

In one day 4,000 people paid for admission to the Livingstone National Memorial at Blantyre, Scotland.

Lady Beatty, wife of Earl David Beatty, died in her sleep at Dingley, Leicestershire, England.

The Norwegian Government will occupy a strip of Greenland this summer despite protests by Denmark.

Two British States companies are pushing exploration work on a trans-Atlantic route to Europe via Canada and the Arctic.

In 1931, 684 deaths were granted in Canada, or 21.8 per cent, fewer than in 1930 when they were 875, the Dominion Bureau reports.

British Columbia has made formal application to the federal government for an advance of \$100,000 from relief funds to aid in a land settlement scheme.

Soviet industries increased their output 19.6 per cent during the first five months of 1932 over the corresponding period last year, according to figures published.

Another surprising discovery by the famous Curie family is now stopped more easily by common paraffin than by lead, is reported in "Nature," British Journal of pure science.

A small pebble was thrown against the brass "stick" of a propeller causing an air liner bound from Croydon, England, to Paris, with 24 passengers, to return to Croydon and transfer its passengers to another machine.

The hope that Lord Willington, viceroy of India, would end the impasse between the government of India and Mahatma Gandhi was expressed by George Lansbury, Labor Leader in Commons.

Repairs Would Cost Plenty

Sunday Visitor To Farm Had Badly Mussed Up

A resident of Mockton, Ontario, who is noted for the speed and shyness in which he always keeps his car, went on a visit one Sunday to a friend living at some distance. The car was parked out in the open yard. The bull, seeing this strange object in the yard, had his curiosity aroused and came on to investigate. Seeing his image reflected in the side of the well groomed car, he presumed he saw a rival. He threw up the turf with his hoof and advanced to the conflict. He charged again and again until the rival was no longer visible and the side of the car presented a mass of scores and dents. Walking around the car, he perceived another rival on the other side and treated him similarly. No doubt, the bull had his satisfaction, but the owner is now premeditating the payment of a bill for having his car re-shaped and re-laquered, and believes that the stall is the place for bulls.

Was Incongruous Too

Visitor To Prison Shaved In Meeting Prisoner

A neat referee to tactlessness was that administered the other day by Adolph Lewishon, who at eighty-three is interested in prison reform and likes to be shown through prisons. Visiting a celebrated battle with his hair, he stopped to chat and shake hands with the prisoners. The warden, who was along, didn't like this very much, but said nothing until Mr. Lewishon extended his hand to one peculiarly low-brow inmate. The warden couldn't bear it any longer. "Don't shake hands with him. He's incongruous!" he warned. "I'm incongruous too," said Mr. Lewishon, and shook hands cordially.

Interesting Facts About
St. Lawrence Waterway

Completion Of Entire Project Will Take Seven Years

Salient facts of the projected St. Lawrence development include:

Cost—Between \$750,000,000 and \$800,000,000.

Division—Equal apportionment, with Canada being credited with \$210,000,000 for existing deep canals and other navigational works.

Hydro-Power—Five million h.p. will eventually be made available. In the international section, 2,500,000; and in the Quebec section, 3,000,000. (The latter includes the Beauharnois development.)

Power Distribution—The international section development of 2,500,000 h.p. will be divided equally between Canada and the United States. Ontario will take all of Canada's share.

Navigation—The channel will be 27 feet deep.

Time—From the beginning of operations until the first power is delivered—three years.

For completion of the entire deep waterway—seven years.

The First Battalion, Royal Welsh Fusiliers are shown leaving Buckingham Palace after being welcomed by their Colonial Chief, King George V. This famous British regiment has had eighteen years continuous service abroad.

Contract Bridge

By Hamlin B. Hatch, Cambridge Club, Toronto

Defensive Tactics In Contract

Defensive procedure in Contract is that part of the game which requires more experience, knowledge and practice than any other particular department. And this knowledge and experience is entirely apart from that needed in the actual defensive play of the cards.

The defensive bidder is in the position of a general in a battle in which the forces are not evenly matched and he knows that the forces are inferior to the forces of the adversaries. And it therefore becomes necessary for the defensive bidder to make use of camouflage, subterfuge, and any other strategic weapons that come to hand. And this must be done with the two objectives of deceiving and intimidating the opposition, and at the same time, not deceiving the partner. In all the systems of contract so far discussed the principles behind good defensive tactics have been only touched upon. And the reason for this is, that, generally as far as defense goes, each particular deal is an original problem in itself. It then follows that any rules or principles laid down for defense must, for these reasons, be subject to much greater variation than the principles of offensive bidding.

It may be said, after a partnership has opened the bidding, that the majority of the opening bidder are immediately on the defensive. It has been shown that as a rule, the opening bid is made on defensive strength, and therefore immediately the opening bid is made, it becomes known to the adversaries that the opening bidder has more than his share of high cards of the deal. And that therefore, if the partner of the opening bidder has an average high card hand, the balance of strength is in the hands of opening bidder and his partner. It follows, then that, after the opening bid, the first adversary, unless holding a strong high card hand, knows that any bid he makes is made with only a slight chance that he will be allowed to play the hand. What, then, is the object of the overall of an opening bid, when the overcaller is weak in high card strength? Primarily there are three objects—1st. To give what information he can regarding his hand to his partner, while the bidding is at low contracts. 2nd. Any bid made immediately after the opening bid tends to disturb the smooth working of the usual response system between the opening bidder and his partner. To use a colloquialism, the immediate overall throws a "monkey wrench" into the machinery of the partnership language of the adversaries. 3rd. To suggest to the opening bidder and his partner that the hand of the overcaller is strong under the hope that this thought will so intimidate them that they stop the contracting short of game. These then, are the three principal reasons for the defensive overall.

The danger of the weak overall lies in the fact that the partner of the overcaller may be tricked, and the defensive bidder finds himself in

the position of having to take a substantial penalty. In other words, the weak overcaller is gambling and therefore the gambler he takes himself is regarded by sufficient high cards, so that even if the overcaller's partner has a "bust" hand, the resulting penalty will not be too large. The overcaller must always know whether he is vulnerable or not. If vulnerable the overall must not be made unless the hand of the overcaller has between four and five trump tricks in the bid made. When not vulnerable the overcalling hand may be bid a trick or two weaker.

What then are the requirements for an overall? The writer has laid down the following specifications for his own game and has found by experience that the factor of safety in these specifications is great enough so that no serious penalty is incurred except very occasionally.

1st. When not vulnerable to overall with a bid of one. Any five card bid suit with 1½ honor tricks or any four card biddable suit and about two honor tricks. When vulnerable a biddable five card suit with 1½ honor tricks or a four card biddable suit with two honor tricks.

2nd. To overall with a bid of two. When not vulnerable a good five card trump suit (four tricks) and an opening 1½ honor tricks. When vulnerable a strong five card trump suit or longer (at least four trump tricks) and at least two honor tricks.

It must always be remembered that many hands are so distributionally that they may be used to overcall even when the hand contains no honor tricks. With this type of hand however, the writer believes that the overall should not be made immediately, but should be delayed until the second round of bidding. Then when it is bid, the first bid has shown to the partner that the hand does lack honor tricks. And in case of high bidding by the adversaries the danger of a premature double by the partner of the overcaller is averted.

Gift From Queen Mary

Royal Geographical Society Receives Globes Over Century Old

On the occasion of their recent visit to the Royal Geographical Society, Queen Mary and Queen Alexandra spent an hour examining the interesting things in the Hall. Her Majesty showed her appreciation by presenting the Society with two small and rare globes, 150 years old, which the Society welcomed as valuable additions to their historic treasures.

Gives Children a Chance

For two nights in each week during the summer months the section of St. Montreux's streets in a congested district is thrown open as a playground for the boys and girls of the neighborhood. Here the children enjoy their games under the direction of volunteer workers without danger from traffic which is directed into other channels by the police.

The Right Contact

Lord Wakefield, in an address on "Generous Advertising Is True Economy," said: "We always have to come to the newspapers to obtain real contact with customers. The advertiser must know just exactly what he was talking about."

SUNDAY SCHOOL LESSON
JULY 31

THE GIVING OF THE MANNA

Golden Text: "Every good gift and every perfect gift is from above, coming down from the Father of lights."—James 1:17.

Lesson: Exodus 16:1-36.

Devotional Reading: John 6:32-40.

Explanations and Comments

Comments, verses 1-3.—On the fifteenth day of the second month when Israel, the Caravan reached the wilderness of Sin, between Elim and Sinai. Here occurred the three recorded "murderings" against Moses. Fortunate it was for him that he did not know in advance how many and how varied would be the complaints and rebellions of his people for how long he would have to endure them. "Would that we had died by the hand of Jehovah in the land of Egypt," they cried, "when we sat by the flesh-pots, where we did eat bread to the full." "By the hand of Jehovah" is a reference to the last sin inflicted upon the Egyptians. They "ate bread to the full" in Egypt. "For it was the fault of the Egyptians to feed well those employed in forced labor, just as slave owners commonly do their slaves."—Rawlinson.

"They remembered the flesh-pots of Egypt in not their afflictions, the taskmaster's lash and other cruel oppressions. Human nature is ever the same. The spectacles of discontent magnify past blessings and present miseries."

They even accused Moses of having brought them forth into the wilderness to kill them all with hunger. How like the childish and extravagant words of complaint heard today their words sound.

"It is worthy of remark that those who are the most unworthy of liberty are wont to be have most ungrateful towards their deliverers."—Milton.

Delivery For Murmurers Promised, verses 12.—In the early part of the wilderness life the complaints of the Israelites were treated with leniency, as if made by irresponsible children. But as the end of their journeying, these complaints were severely punished, for after so many years' experience God in providence, something better was expected of them. Now God is promised them, "bread from heaven."

"The supply of manna has been variously explained, but though a natural phenomena may indicate the origin of the name, the facts are inadequate, in their ordinary exhibition, to account for the whole phenomenon. One theory, which has met with favor from many, is that the manna was simply the sugary excretion from the twigs of the tamarisk tree, which from the earliest years of man's existence has been used by the Arabs. It is used by them as a delicacy and not abundantly. Another idea has been advanced—that it was derived from the manna which rains known in various countries. There is an edible insect which sometimes falls in showers several inches deep, the wind having blown it from the clouds where it grew, and carried it towards."—Cunningham Gellie.

Recipes For This Week

(By Betty Barclay)

CHOCOLATE DROP COOKIES

2 cups special cake flour, sifted,
½ teaspoon soda.
Dash of salt.
¼ cup butter or other shortening
creamed with sifted brown sugar.
1 egg, well beaten.
3 squares unsweetened chocolate
melted.
¼ cup milk.
1 teaspoon vanilla.
¼ cup walnut meats, broken.

Sift flour, cream, measure, add soda and salt, and sift again. Cream butter thoroughly, add sugar gradually and cream together until light and fluffy. Add egg and beat well. Add chocolate and blend. Add flour, alternately with milk, a small amount at a time. Beat after each addition until smooth. Add vanilla and nuts. Drop from teaspoon on greased baking sheet and bake in moderate oven (350 degrees Fahrenheit) about 7 minutes. Makes 50 cookies.

CALIFORNIA PINEAPPLE SALAD

(Serves 6)
6 tablespoons cream cheese.
2 red pineapples.

Peel oranges and separate into segments. Make cheese into 6 balls, and sprinkle with paprika. Cut pineapples into long, narrow strips. Place a cheese ball in center of each salad plate and arrange orange segments radiating out from it like the petals of a flower. Place strips of pineapple between orange segments. Four French Dressing over all.

Some Helpful Hints

It is convenient to remember that milk removes ink stains, cigarette ashes remove rings left by a wet glass on furniture, ammonia will clean windows with tooth powder, and the black coating away from silver jewelry.

New Finger-Print Method

Reproduction Is Now Possible With-

out Aid Of Photography

A revolutionary method of reproducing finger-prints direct, without the aid of photography, has just been made public by Dr. Leung, assistant director of the technical laboratories of the Lyons (France) police department.

The new procedure eliminates the photographer, says Count A. N. Mirza, writing in *Everyday Science and Mechanics* (New York):

"Finger-printing procedure, at present, is a complicated affair. The method generally uses paper, covered with a specially prepared gelatin solution, and carefully placed over the finger or hand-prints left by the criminal."

A photograph of this is then made by the department's photographer and, after careful development, turned over to the expert for study and research.

"The invention of Dr. Leung completely revolutionizes this work. His method is more rapid and obtains a more perfect print than any other in use."

"Dr. Leung claims that much of the fine detail in the finger-print is lost by the method because, in the first, the print is transferred to paper; then the paper with the print is photographed; then a photograph is made from the negative. In every operation some detail is lost. With his procedure, no detail whatsoever is lost; it is all there."

"The invention consists of a mixture which has a base of collodion, amylacetate, acetone, and ether. This solution is kept in a bottle, and is always ready for use; it is applied in this fashion:

"The detective begins by first dusting the object on which finger-prints are found, with 'animal black.' Over this is then poured some of the mixture which, in a few seconds, forms a thin film, transparent as glass. This film can be lifted very easily off the object on which it is deposited; and on it is found the reproduction of the finger-print, with every detail faithfully recorded."

"There is no necessity then, for making photographs, since the film can be used about like a piece of paper. The traces of the finger-prints can be studied from both sides of the film because of its transparent qualities."

"Dr. Leung's system is to be adopted by every police department in France."

"It is economical; it is accurate and dependable. A bottle replaces three photographers."

Study Polar Phenomena

Twenty-Six Countries To Form Chain

Around the Arctic Circle

The Seven men from the Canadian meteorological service will co-operate with 26 other countries in forming a chain around the Arctic circle to study polar phenomena during the second international polar year program, beginning August 1.

J. E. Little is already in residence in Hudson Strait, and R. C. Jackson and C. Kinnear have left for Fort McMurray, Alta. They will be stationed however at Coppermine.

The second Canadian party, led by P. T. Davies, of McGill University, Montreal, includes H. W. Currie, of the University of Saskatchewan, S. McVeigh of Queen's University and John Rea, cook-observer. They will be stationed at least 14 months at Fort Churchill.

The British expedition, destined for Fort Rae, on Great Slave Lake, was reported to be on its way.

Was First U.S. Woman Senator

Dr. Martha Hughes Cannon, 75, physician and first woman state senator in the United States, died recently at Los Angeles. She was elected to the Utah Legislature in 1896 and served two terms, sponsoring laws pertaining to public health and the welfare of women and children.

Dairen, Japan, has a Jam of export goods awaiting shipment.

A "dye," the Funktunks are having a divorce. Do you know who is to have the custody of the dog?—Kasper, Stockholm.

The cost-of-living index in Germany is rising.

TO OPEN WAY FOR FREER TRADE WITHIN EMPIRE

Ottawa, Ont.—The Imperial Economic Conference passed swiftly from opening declarations of policy to the less impressive consideration of methods of work, heads of delegations met and decided to appoint five committees:

- (1) Promotion of trade within the Commonwealth.
- (2) Customs administration.
- (3) Commercial relations with foreign countries.
- (4) Monetary and financial questions.
- (5) Methods of economic co-operation.

No appointments to the committees were made. Each delegation is to meet separately, decide on its nominees, then formal appointments will be made.

Meanwhile all delegates are kindly discussing the offer of wider preference with which Premier Bennett opened the conference. The seven ministers of the British delegation are to hold a series of "cabinets" to examine the Bennett proposal in all its implications.

Under the present British tariff system, wheat and meat are on the free list. Imports of wheat and meat from the dominions there receive no tariff preference in the British market.

Mr. Bennett proposes the United Kingdom "shall extend the principle of tariff preferences to natural products." Wheat and meat are not specifically mentioned but they obviously come within the scope of the Bennett scheme. These possibly will be the chief problem of the British delegation in determination of its attitude. For the moment, however, the British content themselves with reiteration of Mr. Baldwin's words at the opening session—that the British delegation will study the proposal sympathetically on the lines laid down by Mr. Bennett, that they will do their utmost to co-operate with goodwill to accomplish the purpose in hand.

Mr. Bennett's proposals climaxed a day without parallel in the history of the Dominion. Delegates from the nations of the Empire had gathered in the Memorial Chamber of the Peace Tower, and there, in homage to Canada's war dead, had laid wreaths on the altar of remembrance. The chamber of the House of Commons presented such a scene as it has not known before—Premier Bennett and the Canadian delegates in the seats of government; facing them, in what are normally the seats of opposition, a number of British Prime Ministers, the British Chancellor of the Exchequer, five other members of the British cabinet; and on either side the seats of the House of Commons, with delegates and advisers from all the far corners of the British Commonwealth.

On assumption effective operation of the agreement would not be impaired by unfair competition, Mr. Bennett, on behalf of Canada, proposed to grant to the United Kingdom:

- (1) Extension of the free list;
- (2) Retention of the existing preferences in favor of Great Britain;
- (3) Increased preferences in respect of a selected list of articles in which Great Britain is especially equipped to supply the Canadian market without incurring efficient Canadian enterprise.

In exchange, Canada asked:

- (1) The retention of existing preferences.
- (2) Their effective extension to those other natural and processed products of which the United Kingdom is an importer.

Irish Issue Shelved

Ottawa, Ont.—The differences between Great Britain and the Irish Free State will not be projected into the deliberations of the Imperial Conference. This was made clear by Rt. Hon. J. H. Thomas, Dominion secretary in the British government, and also by Sean T. O'Kelly, vice-president of the Free State executive council.

Canadian Ship Sold

Montreal, Que.—The ship *Calamion*, Commander, now lying in Halifax harbor, has been sold to an Indian syndicate. This is the first Canadian national steamship to be sold in accordance with the decision of the directors to reduce the fleet. The sale price was stated to be approximately \$22,000.

W. N. U. 1952

Dictatorship For Prussia

Marital Law Has Been Declared In Berlin, Germany.

Berlin, Germany.—The federal government set up a dictatorship over the entire state of Prussia, declaring martial law in Berlin and the province of Brandenburg and sweeping out of office every member of the Prussian state cabinet.

This drastic action precipitated the worst constitutional conflict since the founding of the Reich in 1871. The Prussian authorities, declaring the dictatorship to be contrary to law, refused to yield to the demands of the federal government except by force. In many cases force was used.

Berlin was under heavy guard tonight, and machine guns were mounted in the court in front of the federal chancellery. Every precaution was being taken to prevent disorders.

Under an emergency decree issued by President Paul von Hindenburg, Chancellor Franz von Papen became federal commissioner administering the state of Prussia. He named Lord Mayor Franz Bracht of Essen as deputy commissioner. Lord Bracht's first act was to attempt to take over the state ministry of interior, and he encountered plenty of trouble.

The minister of interior, who was under Dr. Karl Severing, sworn in as the present federal governor, and of his move to sweep away the state government. When Severing refused to hand over the ministry a police captain threatened to drag Dr. Severing out. So Dr. Severing yielded his post. He was not arrested.

Sends Largest Group

United Kingdom Has Greatest Representation At Conference

Ottawa, Ont.—Delegates, official and technical advisers, personal staff secretaries and unofficial counsellors to the Imperial Conference number 772. Of these, the United Kingdom has the largest proportion, with 78, which is one more than Canada itself.

Great Britain has sent seven delegates, 55 advisers, members of personal staffs, business consultants, unofficial counsellors and secretariat. Canada's delegation totals 13, with 10 advisers and a secretariat of 14.

The smallest group is from Southern Rhodesia, whose premier, Hon. H. W. Moffat, heads a party of eight. The other empire nations distribute their representation as follows: Australia, two delegates and 20 advisers; New Zealand, two delegates and 14 advisers; South Africa, three delegates and 22 advisers; the Irish Free State, three delegates and 17 advisers; Newfoundland, two delegates and seven advisers; India, eight delegates and nine advisers.

Accommodation for this large number has been found in the House of Commons Building, while a special directory of information has been issued regarding them.

Revival Of World Trade

Prime Of Wales Believes Better Times To Come Soon

London, England.—The Prince of Wales said that he believed this year would witness the first move toward the world's return to better times. Speaking at the West African dinner, the Prince said he hoped trade recovery was not far distant and added:

"It is my belief that 1932 will witness the beginning of a return to happier and more prosperous times and a great revival of world trade."

Triumph For League

Four Powers Agree In Principle To Limit Armaments

Geneva, Switzerland.—A resolution ending the first phase of the world arms conference was drawn up by the general committee of the conference. Edouard Herriot, French Premier, announced the four powers—France, United States and Italy—had agreed in principle that land armaments should be limited. Herriot welcomed the text as "a triumph for the League."

Trade With New Zealand

Ottawa, Ont.—The trade agreement between Canada and New Zealand has increased the flow of Canadian goods to the southern Dominion, says a statement issued by the Department of Trade and Commerce. Exports to New Zealand doubled in June, reaching a value of \$237,578.

Prince George Promoted

London, England.—Prince George, youngest son of the king, has advanced another step in his naval career with appointment as personal naval aide-de-camp to his majesty.

Cabinet Shuffle In Italy

Five Ministers and Eleven Under Secretaries Displaced

Rome, Italy.—Dino Grandi, Italian foreign minister, has reshuffled a far-reaching cabinet shake-up ordered by Premier Mussolini.

Five ministers and 11 under-secretaries were displaced in the shake-up. Mussolini retained for himself two of the vacated portfolios.

These constituted the first changes in the cabinet since September, 1929. The shake-up was regarded as another "rotation" to bring new blood into the government without any change of policy.

The five ministers who resigned were Grandi; Alfredo Rocco, minister of justice; Antonio Muzio, minister of finance; Prof. Balbo, minister of education; and Giuseppe Bottai, minister of corporations.

Mussolini, who already was minister of interior as well as premier, kept for himself the ministries of foreign affairs and corporations.

Among the under-secretaries who were displaced were Di Duca's of the right-hand man, Francesco Guinza.

May Last Five Weeks

Cautious Estimate Made For Deliberations Of Imperial Conference

Ottawa, Ont.—Morton MacDonald, M.P., son of Prime Minister MacDonald, thinks the deliberations of the imperial conference delegates might last five weeks, which is a cautious estimate of everybody. Who emerges from the five weeks remains to be seen; but if the impriveness of persistence is the rule, the results should be thoroughly comprehensive.

With the exception of Newfoundland's Prime Minister, the personnel of the conference is complete. Rt. Hon. Stanley Baldwin, Lord President of the Council, heads a British delegation which has no fewer than 75 members included. Less than 15 are the other national groups.

Canada's delegation totals 13, with 10 advisers and a secretariat of 14.

The smallest group is from Southern Rhodesia, whose premier, Hon. H. W. Moffat, heads a party of eight.

The other empire nations distribute their representation as follows: Australia, two delegates and 20 advisers; New Zealand, two delegates and 14 advisers; South Africa, three delegates and 22 advisers; the Irish Free State, three delegates and 17 advisers; Newfoundland, two delegates and seven advisers; India, eight delegates and nine advisers.

Accommodation for this large number has been found in the House of Commons Building, while a special directory of information has been issued regarding them.

U.S. Losing British Trade

Through New Tariffs and Suspension Of Gold Standard

London, England.—The United States has lost more than half of its immense trade with Great Britain since this country adopted a tariff policy six months ago, has been disclosed.

When the national government suspended the gold standard and the biggest customer of the United States next to Canada, buying \$50,000,000 worth of American goods every month. Today that monthly business has fallen to \$21,000,000.

Business men in the United States can blame world conditions for much of their vanished trade. But it is Britain's new tariffs, aided by the suspension of the gold standard, which have struck the severest blow.

Combined, these two factors now make the average United States product subject to a virtual duty of 50 per cent. Until recently, when the anti-dumping measures were replaced, the duty was virtually 80 per cent on some of the chief exports from the United States, such as wheat.

So far the United States has had no grounds for making representations, since there is no evidence yet of discrimination against the United States.

Few United States manufacturers have found it worth while to establish branch factories in Britain so as to escape the tariff. The outcry, they say, is too great for the advantages to be derived.

EMPIRE GUESTS WELCOMED AT OTTAWA DINNER

Ottawa, Ont.—While hundreds of candles blazed on bright green tablecloths, Rt. Hon. R. B. Bennett, Prime Minister of Canada, welcomed once again the delegates to the Imperial Economic Conference at a setting of rare beauty, nearly 700 distinguished guests from all parts of the British Empire joined in good fellowship. It was the first grand dinner, and Canada gave of her best.

The scene was one which impressed itself upon the memory. Green was the prevailing color. Along the side of the great dining room the long head-table, covered with its green damask and ornamented with a lavishly displayed silver and flowers, focussed attention. Off from it ran 11 other shorter tables, each covered with the same green covering.

Arrive the great room, the soft light of the hundreds of winking candles, dotted scores of white-clad waiters. From the balconies, where a few guests were seated, music came.

At the tables sat men famous in the history of the British empire. The centre figure at the head of the table was Prime Minister Bennett, sat under a group of flags—the flags of all the state nations in the Commonwealth were represented at the conference. Down the long table were the heads of the delegations—Great Britain, Australia, New Zealand, South Africa, India, Irish Free State, Newfoundland, and Southern Rhodesia. Interspersed with these leaders were their wives, and also members of the Dominion government.

Beautiful dresses shimmering forth all the colors of the rainbow, shone like the background of conventional black and white worn by the men. No uniforms were worn, but many of the distinguished guests wore "Imperial" and "Imperial" Speeches, which did not start until 10 o'clock were brief.

As Prime Minister Bennett rose, the gathering rose with him. Cheers after he greeted him, and green napkins waved like leaves around the room.

"This is a family gathering," said Mr. Bennett in happy mood. He referred to the fact that "men of great distinction in their own countries" were there. Canada numbered among her guests three former prime ministers, a former lord chancellor of Great Britain, a present viceroy of Southern Rhodesia, H. W. Moffat, was a nephew of the great missionary, Livingstone." Newfoundland, however, was there in the person of an eminent delegate present.

The prime minister gave the toast: "Our Guests." It was honored standing.

Then Rt. Hon. Stanley Baldwin, head of the British delegation arose. Again applause sounded.

Opium Seizure

Drug Found Concealed In Galleon On Board Liner

Vancouver, B.C.—Customs officers have seized \$7,000 worth of opium found concealed in a galleon on board the liner "Empress of Japan."

The officers obtained additional scattered contraband valued at \$500. Members of the crew reported that some deliveries of narcotics were made to the liner by a Chinese agent. The contraband was picked up by fishing boats.

Canadian Wheat For East

Vancouver, B.C.—Another cargo of Canadian wheat will leave here soon for the far east. It was stated in grain circles today that four thousand tons of about 13,000 bushels had been sold in Vladivostok for August delivery through the local firm of Kerr, Gifford and Co., Ltd.

The order will be made immediately. A few months ago several million bushels of western grain were shipped from here to the Russian port.

Prevent Soil Drifting

Winnipeg, Man.—Minister of Agriculture will be required by law to keep their farms at home. If the Wood River Municipality Council has its way, the city council will be required to enact laws requiring farmers to prevent soil drifting onto roads. Failing this, action is promised at the owner's expense.

RAMSEY MACDONALD'S CROWNING ACHIEVEMENT

To bring about a successful conclusion to the Lausanne Reparations Conference, then all hope of a satisfactory settlement was lost is the great achievement of Prime Minister Ramsay MacDonald of Great Britain. Ramsay MacDonald is shown standing between Herr Von Papen, German Chancellor (left), and Dr. H. Herriot of France (right), whom he brought together and persuaded to settle their differences. His Majesty the King sent the British Premier a telegram of congratulations following the signing of the accord.

Minneapolis-Moline Discounts
Farmer Debts Helpful plan
announced for this Year's
Payments

Welcome news to all farmers owing
Minneapolis-Moline is contained in an
announcement just made by Mr.
Aspelund, Divisional Sales manager
of Minneapolis-Moline Company, Re-
gina. According to this announce-
ment a discount is now being allowed
on all farmer notes regardless of when
they are due, that is, whether they
happen to be past due or due in the
future.

Discounts allowed range from 5 per
cent to 10 per cent depending upon
the amount of payment which, in all
cases must exceed \$250. This offer
expires November 30, 1932. In the
announcement of this plan Mr. Aspelund
said: "The Minneapolis-Moline
Company, makers of Twin City tract-
ors, threshers, and combines, and
Moline implements, has been supply-
ing machinery to wheat growers in
the prairie provinces for two or three
generations and expects to continue
doing so for many years to come.
Under present conditions our Com-
pany feels that it should do all within
its power, to help our friends and
customers keep their credit standing
good, and in turn we naturally expect
their full co-operation. These unusual
discounts are given in the hope and
expectation that they will be a sub-
stantial contribution toward a return
of better times."

Champion Consolidated School District No. 40

The trustees have fixed the follow-
ing schedule for the operation of the
van routes of the district: North
East route \$3.75 per day, South East
\$2.50 per day, Long South West \$3.75
per day, Short South West \$3.00 per
day. Ratepayers in arrears for taxes
will be permitted to operate a route
(applications for less than one month
will not be considered), applications
to be in by 7:00 p.m. Tuesday August
9th, 1932.

Routes and rates to be subject to
the revision of the trustees as con-
ditions warrant.

TENDERS FOR COAL
Tenders for the delivery to the
school of 100 tons of screened coal,
more or less will be received at the
same time, delivery to be made as
required. The lowest or any tender
not necessarily accepted.

H. COOPER, Secretary

House to Rent

6-room house formerly occupied by
S. C. Milliken to let. Good location.

Ontario and Quebec farmers stage
a near riot at Ottawa, when Prime
Minister Bennett refused to address
them. Their demands upon Canada's
delegates to the economic conference
had already been presented in writing
and by committee, but the farmers
wanted something worse from the
highest authority to carry home.
Little damage is done, unless politi-
cally, by the outburst. The Canadian
farmer is no ready rioter; he's just
human. Seemingly sitting on a tack,
he merely wishes everyone who might
be moved to help him to get to the
point.

All eyes turned towards the con-
ference at Ottawa. That this imper-
ial conference will accomplish some-
thing really useful is confidently
anticipated. It seems to be accepted
as a foregone conclusion that the em-
pire will not break away from a com-
mon monetary standard. Further-
more it is believed that the gold
standard itself will ultimately be
restored as completely within the
empire as outside of it. On monetary
policy, therefore the empire con-
ference is unlikely to indulge in any
fantastic experiments, and the trade
agreements should be important.

*Minneapolis Moline Says,—
"Save cash by buying new—Drastic Price
reductions on many Machines—Easily
understood, most liberal 77 cent Wheat
plan—Buy and save on the extra Qual-
ity M-M Tractors, Threshers, Combines,
Supplements. Terms to suit today's Conditions"*

MINNEAPOLIS THRESHERS

Standard of the world for 44 years. A dozen extra
features that mean more clean bushels per day. Hold
the thresh run together year after year giving better
satisfaction. M-M grain guarantee plan offers you
big savings by buying now. Talk to your M-M dealer
about saving on these big capacity, standard threshers.
Mail the coupon.

TWIN CITY TRACTORS

Famous the world over for giving "3 extra years of
use". Greatly reduced prices and the M-M grain price
discount effective on 100% of the selling price. Get
that new Twin City tractor NOW. Go to your dealer.
Your bushels will buy for more on easily understood
M-M plan. Twin City's have served many Canadian
farmers probably for 15, 12 and 13 years. They use
the cheapest fuel. Mail the coupon.

MOLINE IMPLEMENTS

Famous over Western Canada since the first set-
tlers moved in. They helped you and your fathers turn
the prairies into waving fields of grain. A complete
line unequalled for sturdy dependability and modern
labor saving design. On any order of M-M goods over
\$300 the special M-M grain price discount applies.

MINNEAPOLIS COMBINES

The best combines for Canada, made for Canadian
farmers to get all the grain year after year regard-
less of conditions. Light or heavy, a Minneapolis
combine will thresh all your grain better, most
economically. This year buy at tremendous savings.
Wheat price discount plan applies. M-M dealers
offer you most liberal money-saving plan and prices
ever made during these times.
